

Jonathan Neve

Associate, European and UK Patent Attorney

Jonathan is a European and UK Patent Attorney based in our Oxford office. Jonathan joined J A Kemp and became an Associate in 2021, having previously spent four years at another leading patent firm.

During his time in the profession, Jonathan has been involved in numerous oppositions at the EPO, both offensive and defensive. He also has extensive experience in EP prosecution and freedom-to-operate analyses. Much of Jonathan's work has been related to DNA sequencing assays, including single cell analysis, and the associated bioinformatics workflows. He also has experience in peptide therapeutics, antibodies, and biomarkers.

Jonathan has a Master's degree in Molecular and Cellular Biochemistry and a DPhil in Biochemistry, both from the University of Oxford.

During his DPhil, Jonathan was heavily involved in both the set-up and running of a new high-throughput DNA sequencing facility in the University of Oxford's Biochemistry Department, which was subsequently used in his, and many others', research. Combining transcriptome-wide analysis with individual gene studies allowed for the identification of different post-transcriptional regulatory pathways active in different cell lines, as well as highlighting the pervasiveness of these mechanisms. He was also awarded the BTP Fellowship in Microbiology and Molecular Genetics at Pembroke College during his doctoral studies.

Services & Specialisms

Patents, Freedom to Operate, Invention Discovery, IP Strategy, Patent Drafting, Filing and Prosecution, IP Review, Portfolio and Cost Management

Location

Oxford

Education

University of Oxford, Masters in Molecular and Cellular Biochemistry; University of Oxford, DPhil in Biochemistry

Qualifications

European Patent Attorney; UK Chartered Patent Attorney

Membership of Professional Bodies

Fellow of the Chartered Institute of Patent Attorneys (CIPA); Member of the Institute of Professional Representatives before the European Patent Office (EPI)
